

HEIGHT RESTRICTION

5600 Height Restriction Barrier

Secure | Simple | Cost Effective | Easy To Use

The 5600 Height Restrictor Barrier is constructed from high quality steel rectangular box section.

It provides an ideal solution for the prevention of access for high vehicles to unauthorised areas such as staff car parks or underground low level car parks.

It is a durable and reliable restriction barrier, available as single or double leaf, either standard or heavy duty box section.

Clear signage allows vehicle occupants the opportunity to determine whether they have sufficient clearance to proceed under the cross beam in order to access.

The opening variants can be locked in either open or closed position via an additional latch post and a padlock respectively.
