Round	Round
Op Weight	7Kg
Top	Twist Lock Handle
Diameter	76mm
Height	580mm
Weight	20kg

## Telescopic Security Posts offer a high level of security and are easy to use.

They require the user to dig down into the ground and concrete the unit in.

The top of the unit is finished level with the finished surface. The user then opens a flap to reveal the post, unlocks the post, pulls the post up and locks it in the raised position.

The post can be locked in the raised or lower position.
